🍔 ReactJS Intro + A11y

We're going to use this lecture to give you a simple introduction to basic ReactJS App whilst also chatting about some important aspects of A11y to consider. To do this, we will re-explore an activity from week 4.

🍔 Forms And Events

Let's build a simple form for a communication tool that:

- Says "Please invite your friends to join CSE" at the top
- Has a textarea with a welcome message. On blur, if the field is empty, colour the background red until valid.
- Has 2 inputs for emails addresses, with an "Add more" button at the end that populates more fields (2 at a time) until you reach 10 addresses.
- Has a submit button that when clicked, provides a summary screen, before allowing the user to cancel or continue.
- You should take particular care in styling this page nicely whilst also considering key accessibility elements

👂 Feedback

Or go to the form here.
